IMAGINiT Clarity for BIM Coordinators

Automate Revit Drudgery.

Save an average of 220 hours per year per project.

Combining Autodesk Revit or BIM 360 Design with IMAGINiT Clarity creates a powerful tool for your team. You're able to automatically:

- Print PDFs
- Export DWGs, share to Dropbox, BIM 360, BOX or FTP
- Create datasheets for rooms, equipment and furniture
- Cleanup models you exchange with partners (and they provide to you)

Share Data Securely

Beyond that, you can share data from your model—without jeopardizing the model itself. Provide web-based reports that allow your project partners to:
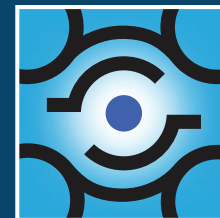

- Request changes
- View up-to-date room and equipment datasheets and schedules
- See only the files you want them to—and nothing more
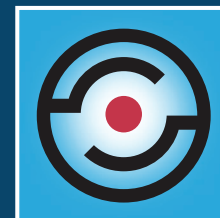

Control Your Model, Proactively

Beyond the automated tasks, you can also save time by getting ahead of model health issues with tools that provide:

- Rules to highlight and draw attention to missing or incorrect data
- Revit information including revisions and back references
- Model analytics reports—identify and understand 'problem models' proactively across all active projects.
  - Project Metrics Dashboard – see what models need attention, at a glance
  - Revit Warnings Report – identify the warnings that are important to your teams
  - Content Metrics – quality and usage of your Revit Families
  - Track file size, open times and over 50 other criteria

IMAGINiT Clarity also integrates with Bentley ProjectWise, DropBox, BOX, FTP, BIM 360 Teams, BIM 360 Docs and more.

IMAGINiT Clarity works with Autodesk Revit, Collaboration for Revit, and BIM 360 Design. If your team is using Autodesk Revit Server, you can add IMAGINiT Clarity Security to gain the benefits of Clarity with added security for external collaboration. Learn more at www.imaginit.com/ClaritySecurity.

Does your owner or facilities manager require access to the model? Have them review IMAGINiT Clarity Owner Data Portal. This unique tool allows owners and facilities managers to review and edit information via an online system during the construction process (and after). Learn more at www.imaginit.com/ClarityODP.
