

## Leica BLK360 SmartStart Program

### Ensure the Success of your BLK360 Scanner Implementation

Inaccuracies in data collection can undermine the trust designers have in the data used during project design. Missteps can cause frustration and slow adoption of the tools that were designed to help your team.

Based on nearly two decades of implementing reality capture workflows and technologies for a variety of organizations, IMAGINiT created the SmartStart Program to prepare your team to successfully deploy the BLK360 scanner on your next project.

IMAGINiT's BLK360 SmartStart educates your staff on the processes and workflows to make the use of the BLK360 successful. At the completion of the SmartStart, your field and office design staff will be fully prepared to use the BLK360 and Autodesk ReCap 360 Pro to collect accurate field data, efficiently process that data, and maximize the data to its greatest benefit within your current and future projects.

### How do we get started?

An IMAGINiT expert will educate your field and office personnel on topics such as:

- Unboxing and field setup of the Leica BLK360
- Field practices for free-station, target based & target-less scanning
- The Autodesk ReCap 360 Pro mobile Interface
- Field collection to office manipulation data flow
- Autodesk ReCap 360 Pro registration techniques
- Point cloud clean-up
- Data evaluation & measurements
- Data segmentation, regions, & visualization
- Data management tips & tricks
- Use of point cloud data in design environments pertinent to student requirements (AutoCAD, Civil 3D, Plant 3D, Revit, Navisworks, etc.)

We'll also provide a brief overview of additional toolsets from Leica including Register 360, JetStream and CloudWorx to help take your projects to the next level.

Get your team off on to a smooth start with the Leica BLK360 and Autodesk® ReCap360 Pro.

### About IMAGINiT

IMAGINiT Technologies, a Rand Worldwide Company, is a leading provider of enterprise solutions to the engineering community, including the building, manufacturing, civil and mapping industries. With over 25 years of experience, and 45 offices throughout North America, we provide the expertise, training and support to help companies realize the full power of design technology, maximize ROI and gain competitive advantage.

IMAGINiT is a leading provider of Autodesk software solutions and the largest North American Autodesk Authorized Training Center (ATC) partner. All of our locations are supported by a vast pool of engineering resources focused on developing real-life business solutions for their local clients.
