Solutions Beyond Software for Government Agencies

Challenges facing government agencies continue to mount as decision makers are under constant scrutiny on how they choose to invest taxpayer dollars. When making technology decisions, buyers need to continually look for ways to increase efficiencies while constantly reviewing and improving processes.

Choosing the right tools for your projects is just the start. At IMAGINiT, we have in-depth knowledge of government standards including emergency response, research and development, data management and security. Our team's real-world experience with government requirements and regulations help provide successful solutions to agencies of all types.

IMAGINiT has a proven track record of helping agencies leverage the full potential of their design technology through effective implementation and support. Here are some of the ways that partnering with IMAGINiT will support your mission of executing successful initiatives:

- Boosting productivity through proper training and support
- Optimizing processes and workflow to ensure your team is working more efficiently
- Effective collaboration with internal departments, contractors, and vendors
- Maximizing ROI with on-time, on budget projects

Industry-Leading Expertise and Services

Technology Solutions
As the leading provider of Autodesk, Leica Geosystems and ARCHIBUS facilities management software, our experts have certifications and experience in helping customers at any level of any agency. Our understanding of government-mandated requirements along with our industry knowledge allows us to seamlessly work with your agency to determine what the right solution is, for both your software and hardware investments.

Professional Services
From implementation to data management and computational fluid dynamics analysis, our team has more than 25 years of experience assisting government agencies. We work collaboratively across the federal government, as well as state and local government, providing national coverage with our dedicated government team. With our breadth of professional services, we help agencies reach their maximum potential.

Training
As the largest Autodesk Authorized Training Center partner in North America, our award winning Autodesk instructor-led training programs are offered as classroom-based, custom, live online and on-demand and are the most comprehensive and flexible in the industry. Maximize your most valuable asset—your people—by keeping their skills up to date through a training offering that fits your needs.

Reality Capture
If your organization is looking to digitally capture your existing space or you need to re-create a model, reality capture may offer a solution. IMAGINiT's team of reality capture experts help agencies understand how 3D laser scanning, photogrammetry and LiDAR work as part of a complete design process. Even if your organization does not plan to directly use reality capture technology, only the valuable point clouds they offer, consider looking to IMAGINiT to understand best practices for creating RFPs that provide the right information for your projects.

IMAGINiT is a leading provider of 3D design and engineering solutions to the building, architecture, manufacturing, civil engineering, and geospatial industries.

In the United States, IMAGINiT works with DLT Solutions to provide state, local, and federal government customers with the expertise needed to meet the challenges of the public sector. As the Autodesk Master Government Aggregator, DLT Solutions assists the public sector in making smart technology choices, simplifies the technology procurement process, and provides state and local government pricing on the GSA schedule for government agencies as well as their prime contractors.

IMAGINiT Software + Utilities

Enhance your Autodesk software and drive greater efficiency across your entire organization with these time saving tools from IMAGINiT's group of professional programmers.
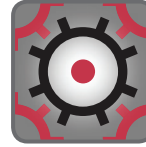

IMAGINiT Utilities for Revit   **IMAGINiT Utilities for Civil 3D**   **IMAGINiT Utilities for Vault**   **IMAGINiT Utilities for Vault Client**

With IMAGINiT Utilties, you can cut down on tedious and time-consuming manual work, automate repetitive tasks across multiple design areas, be assured that vital data is being backed up correctly, maintain pre-determined security standards, and allow your engineers and designers to work more efficiently. Many of these tools are offered at no charge to clients who subscribe to Autodesk products with IMAGINiT. Learn more at www.imaginit.com/Utilities.

IMAGINiT Clarity   **IMAGINiT Clarity Security**   **IMAGINiT Clarity Owner Data Portal**   **IMAGINiT Pulse**

IMAGINiT Clarity for Revit, Clarity Security and Clarity Owner Data Portal
With IMAGINiT's Clarity, you can share files and automate repetitive tasks—all with a simple setup, easy administration and secure connectivity. Built upon the Autodesk® Revit® Server platform, IMAGINiT Clarity enables better collaboration between Project managers and Revit users (both inside and outside an organization).

By using IMAGINiT Clarity you can control your Revit Server setup, automate repetitive tasks, and provide valuable data to non-Revit users. IMAGINiT Clarity can help your team save up to 200 hours per project. Owners can gain insight into data typically locked in Revit with IMAGINiT Clarity Data Portal.

IMAGINiT Pulse Integration Platform
Government agencies maintain a lot of data in a lot of systems. IMAGINiT Pulse SaaS-based systems integration platform, allows you to connect these disparate data sources. IMAGINIT Pulse enables organizations to integrate many different types of applications—independent of platform, programming language or API, while keeping datasets from mission-critical information systems consistent and safe.

eLearning

Our powerful eLearning solution provides 24/7 access to high-quality eLearning resources to help increase your Autodesk software proficiency, whenever and wherever you need them. Access on-demand courseware on all major Autodesk products, and search the library of self-paced, video-enhanced courses that include practice exercises and quizzes to quickly provide answers to your questions.

About IMAGINiT Technologies
IMAGINiT Technologies, a Rand Worldwide Company, is a leading provider of enterprise solutions to the engineering community, including the building, manufacturing, civil and mapping industries. With over 25 years of experience, and 40 offices throughout North America, we provide the expertise, training and support to help companies realize the full power of design technology, maximize ROI and gain competitive advantage.

As an Autodesk Platinum partner, IMAGINiT delivers Autodesk 3D design products solutions and is the largest Authorized Training Center in North America. All office locations are supported by a vast pool of engineering resources focused on developing real-life business solutions to our local clients.
