

## IMAGINiT Utilities for Vault Client

### The Indispensable Time Savers for Autodesk Vault Client

Autodesk® Vault provides a great data management platform, and many organizations are adopting this system. However, certain workflows are needlessly manual, or impossible for non-CAD users. IMAGINiT Utilities for Vault Client addresses some of the most pressing needs of Vault Client users.

IMAGINiT Utilities for Vault Client runs directly inside Vault Workgroup, Vault Collaboration, and Vault Professional and is free to IMAGINiT Autodesk Subscription clients via the [ProductivityNOW Portal](#). Ask your representative for additional details.

### What's Inside Utilities for Vault Client

- **NEW Standard Folders:** Enables the administrator to configure folders of standards that should be updated whenever someone logs into Vault.
- **Lifecycle Change Notifier\*:** Get email notification when your project has lifecycle state changes. New feature for 2017 allows support for folder-based lifecycle transitions.
- **Create Folder from Template:** Quickly and easily set up complex project folder structures with the click of a button. No more manually creating directories, sub-folders or clunky work-a-rounds. Setup multiple templates per your project and/or office standards and make use of this time saver.
- **Extract Bill of Materials (BOM):** Create a BOM within Vault, based on your CAD data and export to Excel or CSV.
- **Create PDF/DWG/DXF:** Generate PDFs from Inventor IDW and DWG files at the press of a button using the Job Processor. The PDFs can be stored in the Vault or published to an external folder. If you require additional automation, Utilities for Vault Client can also auto-generate jobs based on key lifecycle events (for example, releasing a file). PDFs can be created either on-demand or automatically as product lifecycles change. New features for 2017: Includes new job types for making DWG and DXF files from IDW files and provides support for publishing PDFs on lifecycle changes outside of the Vault.
- **Batch Checkout of Files\*\*:** Simple method of checking out multiple files at once.

\* This utility only available in Utilities for Vault Client 2015 - 2017.

\*\* This utility only available in Utilities for Vault Client 2014 - 2017.

### Developed by the Autodesk Vault Experts at IMAGINiT Technologies

As an Autodesk® Authorized Developer, IMAGINiT experts have years of experience delivering tools to help clients bring organization and security to their data. With technical specialists focused on design technology automation and customization, IMAGINiT professional software developers and project managers integrate Autodesk products for organizations of all sizes. From manufacturing clients to civil engineering firms and government agencies, clients rely on our data management experts to streamline processes and make efficient use of their data.

Developed by IMAGINiT's Software Development group in conjunction with IT and engineering professionals, you can rest assured that all your design and drafting data is safe, secure, and well-managed with Autodesk Vault and IMAGINiT Utilities for Vault Client.
