# **Leica ScanStation P30/40**Because every detail matters

#### The right choice

Whether you need a detailed as-built representation of a façade, a 2D floor plan or 3D data for integration into Building Information Modeling (BIM), real-time planning of architecture and building projects with fast and accurate deliverables is important. The new ScanStation laser scanners from Leica Geosystems are the right choice, because every detail matters.

#### High performance under harsh conditions

The Leica ScanStations deliver highest quality 3D data and HDR imaging at an extremely fast scan rate of 1 mio points per second at ranges of up to 270m. Unsurpassed range and angular accuracy paired with low range noise and survey-grade dual-axis compensation form the foundation for highly detailed 3D color point clouds mapped in realistic clarity.

#### Reduced downtime

The extremely durable new laser scanners perform even under the toughest environmental conditions, such as extreme temperatures ranging from – 20°C to +50°C and comply with the IP54 rating for dust and water resistance.

### Complete scanning solution

Leica Geosystems offers the new Leica ScanStation portfolio as an integrated part of a complete scanning solution including hardware, software, service, training and support. 3D laser scanner data can be processed in the industry's leading 3D point cloud software suite, which consists of Leica Cyclone stand-alone software, Leica CloudWorx plug-in tools for CAD systems and the free Leica TruView.

## Leica ScanStation P30/40 **Product specifications**

#### **Control Options**

Full color touchscreen for onboard scan control.

Remote control: Leica CS10/CS15 controller or any other remote desktop capable device, including iPad, iPhone and other SmartPhones; external simulator.

| Functionality                             |   |
|---|---|
| Survey workflows and onboard registration | Quick Orientation, Set Azimuth, Known Backsight, Resection (4 and 6 parameters)       |
| Check & Adjust                            | Field procedure for checking of angular parameters, tilt compensator and range offset |
| Onboard target acquisition                | Target selection from video or scan   |
| Onboard user interface                    | Switchable from standard to advanced  |
| One button scan control                   | Scanner operation with one button concept   |
| Scan area definition                      | Scan area selection from video or scan; batch job scanning                            |

### Your Trusted Active Customer Care

Active Customer care is a true partnership between Leica Geosystems and its customers. Customer Care Packages (CCPs) ensure optimally maintained equipment and the most up-to-date software to deliver the best results for your business. The myWorld@Leica Geosystems customer portal provides a wealth of information 24/7.
