

## Leica RTC360 SmartStart

### Ensure the Success of Your RTC360 Implementation

The Leica RTC360 can offer great benefits—automatic registration and increased speed to name a few, but deficiencies in training and proper procedures can slow down your team’s ability to use the new features. Lack of thoughtful implementation or slowed adoption can create frustration and harm your team’s ability to effectively use the new system.

Make sure you’re getting the most of your reality capture team and tools.

The SmartStart program provides a reliable and effective path to maximize your use of the Leica RTC360 laser scanner and Leica Geosystems processing software. With the SmartStart, you’ll get up-to-speed quickly on best practices for the RTC360 and the software that works best for your organization.

The RTC360 SmartStart program provides education on:

- Proper field practices and data collection methodologies
- Efficient data workflow and data management practices
- Advanced toolsets to expand and enhance RTC360 data use

Need a team that truly understands the challenges of implementing and training your staff to get the most out of Leica technology? Our dedicated team of industry-experienced professionals is here to help you take the next steps.

Contact your IMAGINiT Sales representative to find out how our RTC360 SmartStart program can be tailor-made for you.

### About IMAGINiT Technologies

As an Autodesk Platinum Partner, IMAGINiT Technologies is a leading provider of enterprise solutions to the engineering community. With 20+ years’ experience, and over 40 offices throughout North America, we provide the expertise, training and support to help companies realize the full power of design technology, increase productivity, maximize ROI and gain competitive advantage.
