IMAGINiT Technologies Offers Subsidised Training to Australia's Construction Industry

Subsidised BIM training provided by IMAGINiT offers best in class instruction based on award-winning ASCENT curriculum

ADELAIDE, SOUTH AUSTRALIA – September 20, 2012 — Rand Worldwide (OTCBB: RWWI), a global leader in providing technology solutions to organisations with engineering design and information technology requirements, today announced its [IMAGINiT Technologies](#) division is providing subsidised BIM training to members of the Construction Industry Training Board (CITB). As a CITB authorised Training Provider, IMAGINiT is currently offering the following courses as CITB-subsidised courses: *Introduction to BIM; Revit MEP; and Navisworks.*

"We're proud to be offering subsidised BIM training to CITB members as we truly believe an organisation's most valuable asset is their people," says Michael Lachs, managing director - Australia, IMAGINiT Technologies. "Our combination of top-tier instructors, best in class curriculum and real world examples, ensures students will maximise their learning in every session."

The pervasive adoption of BIM across Australia is changing the way the entire construction industry collaborates and builds projects. Even on a global scale, governments such as Singapore are mandating BIM for all of the government building projects in the country. The Australian government is addressing the human element of this technology shift by subsidising BIM training. Helping prepare construction workers for the skills necessary for the BIM revolution is simply taking smart action to help ensure a sustainable economy.

IMAGINiT provides a full range of public and custom in-house CAD training courses. In fact, IMAGINiT's expert-led classroom-based, live online, on-demand, and private class options are the most comprehensive and flexible in the industry.
