For Immediate Release

IMAGINiT Technologies Releases New Version of IMAGINiT Clarity at Autodesk University 2014

New Features, Increased Security and Automated Version Control Help BIM Coordinators Provide Greater Business Value with Less Effort

BALTIMORE, MD — December 2, 2014 — Rand Worldwide (OTCBB: RWWI), a global leader in providing technology solutions to organizations with engineering design and information technology requirements, today announced that its IMAGINiT Technologies division has released key new features that provide more power, flexibility and enhance BIM coordinators' abilities to monitor projects with IMAGINiT Clarity, IMAGINiT Clarity Connect and IMAGINiT Clarity Connect LT.

"By connecting with our customers across North America, we've been able to evolve the feature set of the Clarity suite of software products to meet the business needs of architects, designers and engineers," says Tim Johnson, senior vice president, IMAGINiT Technologies. "With new tools and workflows that automate manual tasks, BIM coordinators can now increase their productivity and improve the experience for the entire BIM team."

The IMAGINiT Clarity family of products can save project teams hundreds of hours by automating necessary but time-consuming tasks like printing PDFs, exporting data exchanging files or creating data sheets. Built for the Autodesk Revit and Autodesk Revit Server platforms, IMAGINiT Clarity leverages information contained in Revit models allowing firms to deliver projects faster and communicate more effectively.

Latest Enhancements to IMAGINiT Clarity

- *More Power, Flexibility and Awareness for Coordinators.* With more options for view cleanup, tools for understanding task failures, multiple datasheet templates and email alerts for changes, the 2015.1 release of IMAGINiT Clarity provides more information to project coordinators about issues with model workflows such as what release of Revit the model is or issues with Revit Server.
- *Deeper Administrative Controls.* New tools allow administrators to assign projects to specific groups, add assignments and permissions. For those using IMAGINiT Clarity Connect we offer folder-level permission settings.
- *Richer User Experience.* Integration with Autodesk 360 Viewer allows non-Revit team members to view information in 3D, jump to specific rooms or views and jump from the 3D View to equipment data sheets. Providing more context and ability to visualize the space and design for non-Revit users.

Live Demonstrations

Product developers and IMAGINiT industry experts will provide demonstrations of the entire IMAGINiT Clarity line-up of software products at the Autodesk University (AU) IMAGINiT booth (#170).

For those not attending AU, IMAGINiT experts will host a free 60 minute webcast on December 9 at 12 PM (Eastern) to highlight the new features in the suite of IMAGINiT Clarity products. Attendance is free, but advanced registration is required.

Availability & Pricing

All IMAGINiT Clarity products are available with perpetual licensing or on a subscription basis for those who want to use the tools for a specific timeframe.

IMAGINiT Clarity offers an unlimited number of users and projects and also includes basic installation and training. Maintenance fees apply. For organizations that need to collaborate with internal and external teams, IMAGINiT Clarity Connect and IMAGINiT Clarity Connect LT can be packaged with Autodesk Revit Server or can be integrated into an existing installation. Setup and training is included and managed by IMAGINiT's trusted team of implementation and training experts. Pricing is dependent on number of locations, hosts, accelerators and task servers. Maintenance and subscription fees apply.

About IMAGINiT Technologies

IMAGINiT Technologies, a division of Rand Worldwide, advances the way architects and engineers design, develop, and manage projects. Customers of this leading professional services and technology company include organizations in the building, infrastructure, manufacturing and facilities management industries. *Fortune 500* and *Engineering News Record's* Top 100 organizations work with IMAGINiT Technologies to gain competitive advantages through expert technology consulting, implementation, training, and support services. As one of the world's largest integrators of Autodesk 3D design and engineering software, the team leverages unrivalled industry experience to design systems that accelerate innovation while improving project quality and profitability.
