# IMAGINiT Technologies Releases
# Three New IMAGINiT Utilities for Autodesk Revit Software

*Indispensable Productivity Software Applications Now Total 17,*
*Including the Unique Autodesk Revit Excel Link Tool*

**FRAMINGHAM, MA – November 27, 2012 —** Rand Worldwide (OTCBB: RWWI), a global leader in providing technology solutions to organizations with engineering design and information technology requirements, today announced its IMAGINiT Technologies division has released three new IMAGINiT Utilities for Autodesk Revit software. IMAGINiT now offers a total of 17 unique Utilities for Revit.

"Once again our seasoned development team has listened to our clients who have identified additional ways in which our Utilities could further extend the capabilities of their design tools," says Bob Heeg, executive vice president, IMAGINiT Worldwide Operations at IMAGINiT Technologies. "Based on this feedback, we are happy to deliver three additional tools to our Utilities for Revit that boost productivity of Revit users. Our clients tell us these now 17 utilities are indispensable tools that enhance their Revit experience."

**Three New Utilities**

Every IMAGINiT Utility for Revit has been specifically designed to save users time by automating repetitive manual tasks as well as minimizing the errors associated with data entry. All three of these new utilities work with any 2012 or 2013 version of Autodesk Revit Architecture, Autodesk Revit Structure or Autodesk Revit MEP.

- The ***Revit Excel Link*** enables teams to seamlessly extract model data so they can work in Microsoft Excel by enabling bi-directional synchronization between Revit and Excel. Revit users can seamlessly export Revit project data to Excel as well as import data from Excel to a Revit project. Eliminating manual entry of data and sharing the workload with non-Revit users allows team members to increase productivity and focus on higher value tasks.

- The ***Parameter Concatenator*** eliminates the manual labor associated with assembling multiple parameter values into a single text parameter or field. Using a custom expression to automate the procedure also ensures accuracy throughout the entire process. Now marking sheets with a company identifier such as a project number or location or stage is simple and fast.

- The ***Dim Text Update*** overrides multiple dimensions using chosen text options. This utility makes adding prefix, suffix, above, below and other notations such as field verifications or tolerance dimensions quick and easy. Instead of updating fields on an individual basis with the same information, now Revit users can pick to easily update multiple targeted dimensions at once.

**Availability & Pricing**

IMAGINiT Utilities for Revit are available for purchase in Standalone or Named-User versions at imaginit.com/utilitiesforrevit. All IMAGINiT Utilities for Revit remain a free download for IMAGINiT's Autodesk Subscription clients via the ProductivityNOW Portal (portal.imaginit.com).

IMAGINiT Technologies has a long history of creating productivity software that brings new value to Autodesk products, such as Autodesk Revit Model Review (formerly BIMreview), Scan to BIM, and IMAGINiT Clarity and Clarity Workshare. With experts who are focused on design technology automation and customization, IMAGINiT is both an Autodesk Authorized Developer and a member of the Autodesk Developer Network.

## About IMAGINiT Technologies

IMAGINiT Technologies, a division of Rand Worldwide, advances the way architects and engineers design, develop, and manage projects. Customers of this leading professional services and technology company include organizations in the building, infrastructure, manufacturing and facilities management industries. *Fortune 500* and *Engineering News Record's* Top 100 organizations work with IMAGINiT Technologies to gain competitive advantages through expert technology consulting, implementation, training, and support services. As one of the world's largest integrators of Autodesk 3D design and engineering software, the team leverages unrivalled industry experience to design systems that accelerate innovation while improving project quality and profitability.
