

**For Immediate Release**

## **IMAGINiT Technologies Releases 2016 IMAGINiT Clarity Family of Products**

*Time-Saving Features, Administrative Controls and Task Automation Have  
Already Saved Clarity Customers Over 30,000 Hours on 900 Projects*

**OWINGS MILLS, MD – May 12, 2015 –** [Rand Worldwide](#) (OTCBB: RWWI), a global leader in providing technology solutions to organizations with engineering design and information technology requirements, announces that its [IMAGINiT Technologies](#) division will be releasing the Clarity family of products that are compatible with [Autodesk Revit 2016](#), Autodesk Revit Server 2016 and Autodesk [A360 Collaboration for Revit](#). Key new features of IMAGINiT Clarity, IMAGINiT Clarity Connect and IMAGINiT Clarity Connect LT improve collaboration and deepen the BIM coordinators' abilities to manage projects and models.

"As more firms adopt IMAGINiT Clarity products, we provide an ever-growing number of firms the ability to manage and share BIM data with owners and other project stakeholders," Says Tim Johnson, senior vice president, IMAGINiT Technologies. "Our software products team works closely with existing users and those investigating the software to uncover new ways to help save time, money and effort on Revit projects. With many firms looking to include A360 Collaboration for Revit, we have expanded Clarity's capabilities to include this platform, as well as provide new tools for BIM Coordinators."

To date, the IMAGINiT Clarity family of products have saved project teams 31,267 hours on 909 projects by automating necessary, but time-consuming, tasks like printing PDFs, exporting data exchanging files, and creating data sheets.

### **Latest Enhancements to IMAGINiT Clarity**

- *Revit/Revit Server/A360 Collaboration for Revit 2016 Compatibility.* The new IMAGINiT Clarity line-up supports Revit and Revit Server 2016, 2015 and 2014 versions. In addition, Clarity users can now use A360 Collaboration for Revit and benefit from the task automation that Clarity provides.
- *Next Generation Web Viewing.* Users can pan, zoom, walkthrough or flythrough the 3D model. Clicking on individual components allows users to drill down into deeper detail provided by Clarity's datasheets.
- *Powerful Administrative Controls.* Clarity helps BIM coordinators, CAD managers, and project managers proactively access information that was buried deep within Revit. Graphical representations and logs allow users to track the model size, service pack versions, and the amount of time required to synchronize the model. These new features enable managers to identify and address potential problems before they arise, avoiding lost time due to model corruption.

-MORE-

- *Bulk Upload Projects in Revit Server.* Previously it took hours to upload, open and synchronize each new model across the network, and re-path links appropriately. Clarity Connect now automates this entire process so the path to team collaboration is shortened.

## Live Demonstrations

Learn about time-saving features and the value that Clarity can provide project teams during two webcasts on May 19, 2015 at 10:00 AM and 2:00 PM (Eastern Time). During these one-hour live presentations, Matt Mason, director of software development, will demonstrate and answer questions about IMAGINiT Clarity, IMAGINiT Clarity Connect and IMAGINiT Clarity Connect LT. Attendance is free, but [advanced registration is required](#).

## Availability & Pricing

All IMAGINiT Clarity products are available with perpetual licensing or on a subscription basis for those who want to use the tools for a specific timeframe.

[IMAGINiT Clarity](#) offers an unlimited number of users and projects and also includes basic installation and training. Maintenance fees apply. For organizations that need to collaborate with internal and external teams, [IMAGINiT Clarity Connect and IMAGINiT Clarity Connect LT](#) can be packaged with Autodesk Revit Server or can be integrated into an existing installation. Setup and training is included and managed by IMAGINiT's trusted team of implementation and training experts. Pricing is dependent on number of locations, hosts, accelerators and task servers. Maintenance and subscription fees apply.

## About IMAGINiT Technologies

[IMAGINiT Technologies](#), a division of [Rand Worldwide](#), advances the way architects and engineers design, develop, and manage projects. Customers of this leading professional services and technology company include organizations in the building, infrastructure, manufacturing and facilities management industries. *Fortune 500* and *Engineering News Record's* Top 100 organizations work with IMAGINiT Technologies to gain competitive advantages through expert technology consulting, implementation, training, and support services. As one of the world's largest integrators of Autodesk 3D design and engineering software, the team leverages unrivalled industry experience to design systems that accelerate innovation while improving project quality and profitability.
