Inventor Presentations and Documentations

Course Length: 1 day

This course is going to take on the process of presenting and documenting an assembly. When you have an assembly, sometimes there is a need to display the file in an exploded view called a presentation file. In this course we will look at ways to create and use presentation files to convey the Assembly information. Also covered are the tools used in creating a drawing using a template, creating basic and complex views, and dimensioning the document. This course will be using the Inventor software.

Topics Covered

Upon completion of the course, students will be able to:

- Create and maintain drawing templates, standards, and styles
- Generate 2D drawing views of parts, assemblies, and presentations
- Annotate drawing views of your model
- Create an exploded assembly view by creating a presentation
- Create basic linear tweaks
- Create rotation tweaks
- Group, reorder, and animate tweaks
